

Just three minutes' stroll from Harrods, DMC Aesthetics has become the go-to destination for all manner of skin and body rejuvenation, skin health and injectables. Lip enhancement is one of the most popular treatments for patients of all ages (not just those whose lips have become thinner with age). In fact, dreaming of that cameo camera-ready moment when the wedding officiator says, 'You may now kiss the bride', glamorous brides-to-be positively hotfoot it to Dr Dagmara Chudzik's chic and modern clinic to acquire the most desirable, natural-looking, fuller, softer, smoother lips.

At DMC Aesthetics, the doctors use the most advanced range of dermal fillers based on hyaluronic acid from Allergan (Juvéderm Volbella® and Juvéderm Volift) or from Teoxane (the new RHA range). Unlike traditional fillers, these are silky and soft, meaning results are subtle, discreet and utterly kissable.

Providing superb standards in medical aesthetics, DMC works on an individual basis, offering personal consultations with Dr Dagmara to achieve the results patients seek. To that end, the highly trained team offers not only pre-eminent service but also treatments of supreme calibre. The non-surgical range on offer includes dermal fillers, anti-wrinkle/Botox procedures, SkinPen micro-needling,

in pursuit of the perfect pout

Enhance your smile at DMC Aesthetics. Doctors at this chic and modern clinic use the most advanced range of dermal lip filler treatments to give you lips to love

laser treatments and peels, Prohilo, high-intensity focused ultrasound (HIFU) lift, chemical peels, fat reduction with cryo, HIFU and Aqalyx, and hair loss treatments with mesotherapy. So all the latest and safest facial and body aesthetic techniques are available in the heart of Knightsbridge.

POLISH AND GLOSS

Everyone involved in a wedding wants to look their absolute best. For the bride, Dr Dagmara might recommend the DMC Glamour Facial, a 90-minute treatment which includes microdermabrasion or a chemical peel, electromesotherapy (an infusion of vitamins and hyaluronic acid), radiofrequency for skin

tightening, LED phototherapy, and concluding with a hydrating mask. 'This is not one of the commonly offered treatments that simply plump up your skin for a day, this is an effective medical-grade facial treatment to address an individual's skin needs,' she says.

For an anti-ageing boost (hello, mother of the bride and mother of the groom), the HIFU Face and Body treatment is a non-invasive procedure that lifts and tightens the skin naturally, using ultrasound technology. HIFU bypasses the surface of the skin to deliver ultrasound energy at exactly the right depth and temperature to stimulate collagen production in the foundations of your skin. Results are glorious. So that's smiles all round.
