

Be your best self

Winner of Beauty Facility of the Year at the London Lifestyle Awards 2019

JUST TWO YEARS AFTER FIRST opening its doors on the fashionable and vibrant Beauchamp Place, a three-minute walk from Harrods, DMC Aesthetics has rapidly become the go-to destination for face and body rejuvenation, skin health and injectables. Priding itself on delivering the ultimate in medical aesthetics, DMC begins every client's journey towards rediscovering their best self with a free personal consultation with Dr Dagmara Chudzik.

PIONEERING EXPERTISE

DMC prides itself on providing the very latest medical aesthetic treatments and procedures by scouring best-in-market innovations from centres of excellence around the globe. This means that clients can expect a host of world-class rejuvenation treatments at one stylish Knightsbridge address.

Dr Dagmara Chudzik
Specialist in Aesthetic Medicine

Experienced in all aspects of facial and body aesthetic enhancement, Dr Dagmara Chudzik uses the highest quality products and explores the latest techniques to offer her patients the most effective and safe treatments to help diminish signs of ageing and enhance your overall appearance.

DMC Aesthetics prides itself on providing the very latest medical aesthetic treatments

Always at the forefront of the newest and most advanced treatments and techniques, DMC is proud to offer innovative Stem Cell Face Lift treatments, which use the client's own 'microfat' and 'nanofat' to rejuvenate and revitalise the whole face. 'Stem cell procedures are scientifically proven to be the most natural and effective way to provide lasting rejuvenation in a non-invasive and rapid manner,' says Dr Chudzik.

In addition, DMC Aesthetics also offers a wide range of other treatments, including dermal fillers, anti-wrinkle/Botox procedures, PDO threads, plasma eye lifts, SkinPen micro-needling, laser treatments and peels, Prohilo, high-intensity focused ultrasound (HIFU) face lift, facials, chemical peels, fat reduction with cryo, Aqualyx, and hair loss treatments with mesotherapy. As well as this, vaginal rejuvenation, labial puff and intimate filler treatments are on offer.

THE BEAUTY OF STEM CELLS

Microfat, nanofat and stem cells are the newest concept in aesthetic medicine. DMC uses the client's own nanofat cells in a simple transfer process. These stem cells then secrete growth factors that rejuvenate the skin, with results that are superior to other aesthetic interventions. Clients report immediate improvements in the treatment of wrinkles and the thinning skin often caused by ageing. The results can last several years and

procedures take only an hour or two.

'We were very proud to win the Beauty Facility of the Year at the London Lifestyle Awards 2019,' says Dr Chudzik. 'Our clients come from every walk of life. The ambition they all share is the hope of rediscovering the very best of themselves. We help them to achieve just this.'
